Motivation

Nowadays, typing skill is very important when we need to finish a job or assignment on time. Therefore, we would like to develop this game for everybody who want to improve typing skill. We want to solve the main problem. So, we need to make this game to access the user's typing skill and improve their typing skill.

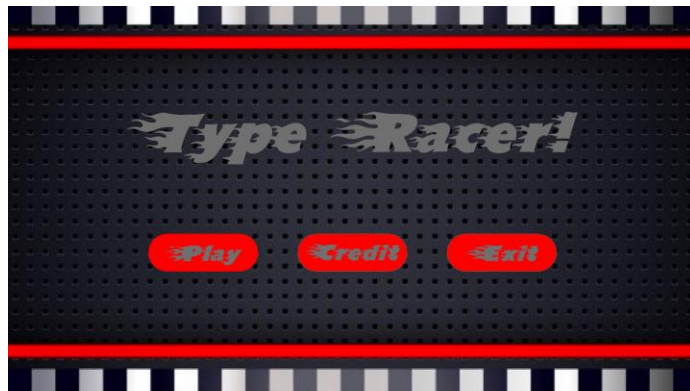

Related games

Methodology

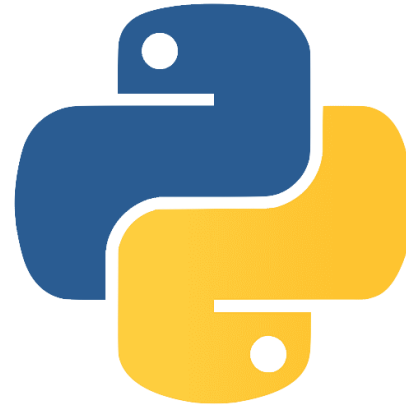

Interface

Technology

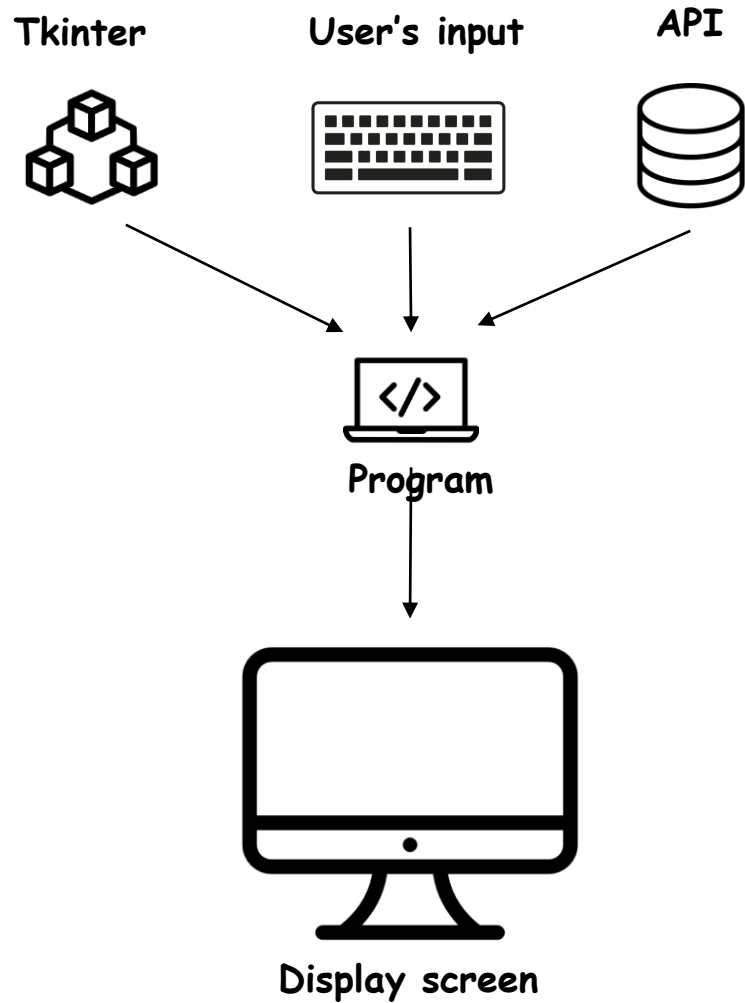

Tools

Object oriented design

- Input
 - User's keyboard input
 - API random sentences
- Output
 - Score
 - Speed of your typing skill
- Function
 - Measure speed of your typing skill
 - Scoreboard

Software Architecture

Conclusions

Now

- Membership
- Scoreboard
- Typing game
- Count in seconds

Future

- Use API for random sentences
- Count by word per minutes
- Develop UI, UX
- Insert more function

Thank You
